**Face Shield**

Replaceable polycarbonate material for clearer vision. Cam-lock feature holds face shield in place. Includes a slide adjustment for easy sizing.

No. MM1631

---

**Banded Hearing Protector**

Foam ear pads attach to a lightweight band. Unique, flexible band maintains low pressure over a wide range of head sizes. Soft foam pads close the ear canal opening without being inserted into the ear. Noise Reduction Rating: 21 dB (band worn behind head) and 20 dB (band worn under chin).

**Cool Flow™ Exhalation Valve**

New valve design helps make breathing easier and helps reduce heat and moisture buildup in the facepiece. It also helps provide cool, dry comfort.

- **Durable and heat-resistant**: made from soft, resilient silicone and heat-resistant plastics. Yoke won't get hot to the touch like metal yokes.
- **New soft seal design**: advanced silicone material provides a softer feel on the face. Unique adjustment design helps reduce tension and pressure points on the face for unsurpassed comfort.
- **Dual-mode head harness**: unique head harness design adjusts easily so user has the option of wearing the respirator in either traditional or drop-down mode.

Recommended for exposure to organic vapors and mists commonly associated with spray painting, lawn and garden pesticides, staining or re-finishing decks and hardwood flooring, and many other applications. Contains a set of 3M organic vapor cartridges, two sets of P95 prefilters and one set of prefiltet retainers.

**Ear Muffs**

Three different headband positions for versatility. Padded headband and soft, foam-filled cups enhance comfort and fit. Sliding headband allows easy adjustment to fit a wide range of head sizes. Adjustable head strap secures ear muffs when the headband is worn under the chin or behind head. Recommended for high noise situations (up to 100dBA TWA). Noise Reduction Rating: 27 dB (26 dB with headband worn under the chin).

No. MM1247

Momentum Arm™
Keyboard Arm
Pull-Out, Tilt & Swivel

Height Range: 6"
Tilt: -15°/+15°
Width: 7.5"
Length: 15.7"
Travel: 15.8"
Storage: Plastic glide on 17” steel track

The Momentum provides a solid solution with fast position change. Features include:
• Easy height control with spring-assisted Lift-N-Lock™ system.
• Soft-touch knob for tilt adjustment.
• Easy-glide track.
• 360° swivel that allows user to move keyboard from side to side.
• Dual swivel option that keeps keyboard tray parallel to the desk.
• Exceeds ANSI/BIFMA standards.

No. WL7438D17
SPECIAL $40.99

Phenolic Keyboard Tray
with Swivel Mouse Pad - For 7438D17 Arm

The 19” Phenolic keyboard tray with mouse tray provides users with many benefits. Features include:
• Rigid construction, sturdier than a steel tray.
• Anti-skid strips that prevent keyboard slippage.
• Plug-in foam gel wrist rest.
• Adjustable and detachable swivel mouse tray with mouse guard.
• Finish and color that helps hide fingerprints, marks and smudges. Graphite gray finish.

No. WL6731D79

Quick Toe 101

Where is “Quick Toe” used?
• Schools • Hospitals • Nursing Homes • Office Break Room • Restrooms
Any sink area that requires ADA access

Why you should buy “Quick Toe”
It looks professional, it works properly. It installs in seconds, it’s waterproof, it’s adjustable at the job site and it’s trimmable to any size. Anything can be glued onto it (Vinyl or Laminate). It can be painted any color. The gap at the toe kick can be the same as the door gap.

The most common objection to using “Quick Toe”
I make my ADA toe kicks from scraps that I get off the floor for free. True, you can do that, but someone still has to cut that scrap into the correct size. Next, they have to assemble all of these parts into the right shape. Then someone has to finish any exposed ends or edges before attaching your shop-butt ADA toe kick permanently to the sink base doors while trying to make your toe kick operate and look professional. All of the above mentioned work had to be done by an experienced woodworker. It takes a lot of time to do even one pair let alone several pairs.

With “QuickToe” your least experienced worker can install “QuickToe” in seconds, it can be quickly adjusted to job site conditions if necessary, and by using “Quick Toe”, you can have that experienced worker making something else that can make you more money because you just saved a lot of time and money and greatly improved productivity in your shop while solving a problem manufacturing item once and for all.

All Porter-Cable Belt Sanders feature metal motor housings for minimum vibration and extended trouble-free tool life.

Carol Santa Cruz - Administrative Assoc.
Started at CMC in 1971

I have lived in Fresno all of my life. Before coming to work at Charles McMurray Company, I worked for Greyhound Bus Lines. My cousin Rita told me about the job at CMC. I have worked in several different capacities in the accounts receivable department over the years. My nickname at work is Mama. I don’t really know why. I have never had children. Animals are my passion. Many of my friends have told me they would love to be my dog Cuddles, because she is so spoiled. Some day I would like to be able to take care of animals that need a good home.

Carol's big hair
Approx. 1973

Have you considered replacing your 15 gauge nails with 16 gauge?
The overall savings could be large dollars on the fasteners!

ask your sales rep
